

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Economics, Management & Trade
Manuscript Number:	2013_BJEMT_5619
Title of the Manuscript:	Impacts of Labor and Capital on Manufacturing Production Function

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors done well but there are some typing mistakes (space required) in the whole revised manuscript. The authors don't add more recent data in the data set. If recent data are not available, it is ok. Also there are some typing mistakes in the reference list e.g., ref. No. [5], [10], [13].	1. We carefully looked at one of the reviewers' request earlier to extend the data set beyond what has been used in the original manuscript. The authors could not come up with anything as recent as the data already provided and is comparable with the relevant calculations established therein. 2. Some typing mistakes brought to our attention were the results of using US English vs. UK English. The manuscript has been carefully checked once again for any misspellings etc. 3. Some typing mistakes pointed out by the final reviewer on the ref. [5], [10], and [13] have been verified and rectified. In addition, ref. [14] has been clarified by adding three more references, as well. They have been added to the manuscript. 4. The proposed revisions in response to the final evaluation comments are highlighted in blue.
