PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Overall, the paper is well developed, documented and structured. The methodology is correct, however, for better understanding of the research, should separate the analysis of results obtained and the discussion of them, into two separate and independent sections related to the overall context.	
<u>Minor</u> REVISION comments	Note, that the lack of knowledge on the part of respondents can undermine the quality of the response, so future research should take into account such limitation to resolve it, by extending the survey to more experienced and qualified professionals, so that the results may be more consistent .
