(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- Grammar needs strong improvement - All symbols must be clearly defined - All charts should have adequate labels and all traces in charts should have legend - The adoption of the time periods is not totally clear. Experiments should be added with other time periods - Several 'postulates' adopted in the VAR model seem not totally justified. They should be explored in more detail. - Some sort of 'prediction/verification' scheme based on past data seems necessary	
<u>Minor</u> REVISION comments	- Improve text formatting - At the end of section 1 introduce organization of the rest of the paper. - References format is incomplete. Should be improved.	
<u>Optional/General</u> comments
