- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The manuscript is very interesting and well written. However, I strongly suggest a major review in the structure. First of all it is not clear the indication of Literature Review and also the subtitles. Secondly, the Data and Methodology did not show the applied mathematical model as well the tests methods. Thirdly, the author presents the model estimation which is very confusing and it is not clear that those are the results. The testes were not commented. The authors did not explore the results accordingly. The authors presented the Implications, but did not concluded the article. Finally the authors presented 15 pages of References which is greater that the entire written article. This is unacceptable.	
<u>Minor</u> REVISION comments
