SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	"Studies at the company and country levels have shown that Information and Communication Technology is positively related to corporate and national economic performance." REFERENCE? Please define old and new generation bank. "Besides, it has also impacted positively on the profits of these banks as well as reduced their investment on other assets." I think you proved correlation, not causation. This sentence should be rewritten. As you know, corporate performance is impacted by so many other factors... "This study relies on both qualitative and quantitative analysis of data to establish the needed relationship between information communication technology investment and banks corporate performance." And "Stated Hypothesis H0: Management practices of ICT do not have significant impact on corporate performance. Hi: Management practices of ICT do have significant impact on corporate performance" In my opinion, there is no relation between IT investment and IT management practices. These hypothesis do not match your model.	

SDI Review Form 1.6

<u>Minor</u> REVISION comments	Suggestion of Keywords: Information and Communication Technology, IT investment, Corporate Performance, Bank sector. In your recommendations you should stress that IT deployment should be followed by the implementation of IT Governance. For instance, the compliance and security issues of information technology in Banks are mandatory. Maybe the title does not summarize well the research done. Suggestion: The Correlation Between IT Investment and Corporate Performance In The Nigerian Banking Sector	
<u>Optional/General</u> comments
