SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The research is based on the data collected from interviews of 50 business owners from different industries and nationalities. The research method and data presented is far too general to make justified arguments. First, author must present more detailed information about UAE's enterprise structure and volume must be given, for example number of enterprises, size structure, industry structure, age structure, etc. Then, more detailed information about 50 interviewed business owners must be given, in order to know how well and which segments they are representing from all enterprises. Now the basic question of the research is that can randomly selected 50 business owners represent the whole set of enterprises in UAE? This question must be discussed and clarified in relation to general business structures of UAE. The unforeseen challenges may vary in different kind of enterprises.	The manuscript has been revised to include more details of the research design and to respond to the reviewer's comment.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
