SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comments (if agreed with reviewer, corrects the manuscript and highlight <i>that part in the manuscript. It is mandatory that authors should write his/her feedback here</i>)
<u>Compulsory</u> REVISION comments	Methodology: ➤ The model adequacy and appropriation is not tested: you can do that e.g using RESET test ➤ How do know whether the variable of your interest is dependent or not. You need to undertake Weak exogeneity test Result and Interpretation ➤ Not detail Conclusion ➤ Weak	Authors have used the same methodology to historical researches. Model adequacy and appropriation is already checked in previous researches. So this model is properly checked and verified. Result, Interpretation and conclusion have improved.
<u>Minor</u> REVISION comments	Abstract: Explaining the relationship among variables in the abstract is enough. The detail should be included in the result. Citation: Refer the manuscript Punctuations problems etc	Corrections have done and highlight that part in the manuscript.
<u>Optional/General</u> comments	Literature: should be shortened Reference: Need to be revised If any ethical issues please clarify. If any competing interest please clarify.	Corrections have done and highlight that part in the manuscript.
