PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- Formulae given in the methodology section has to be given in equation editor as the subscript notations in PDF are completely lost. The authors can also think of using the simplest form of CAGR notation as it is well known to the readers. - Table 1: CAGR for green chilly in Period II is negative for all the variables against a high CAGR in Period I. What could be the economic reason behind the drastic change? - The authors shall work out the instability using CV or Cuddy-Della Valle Index in quantity, value and prices and present along with the CAGR. Commodities with high growth and less instability will be preferred for export. - Despite walnut and mushroom price elasticity of exports are inelastic, there is no much growth in export prices. What could be the reason? - Table 3 to 11: Total price in column 6 has no relevance. Price range may be given with average unit price for that period and interpretation shall be done accordingly. Column 3, 5 and 7 headings have to	Subscripts notations in formulas in Methodology are corrected During this period export prices are fallen and lack of demand. Corrected in the draft CV instability index estimated and presented in table1 and Interpreted Corrected. Walnut price growth rate overall 6.5% and 12.9 during First period. Mushroom Growth rate 5.4.. For these Commodities it is high Corrected.
