SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	This is an interesting and well written manuscript. I would suggest careful attention to some words, such as the use of scanty LINE 46, replace with a more technical term. Interesting about the correlation with education LINE 200 to 204 Suggest more details including how you will disseminate the information to the farmers starting in final portion of paper LINE 256	The word scanty have been replaced with inadequate. Education might not have effect on technical efficiency if the educated farmers do not consider farming as their primary occupation. It is also possible that the farmers do not care to get advice from the agricultural institutions via the extension agents, hence the inverse relationship. Information will be disseminated to the farmers through the Agricultural Development Project (ADP) of Kebbi State, Nigeria. The mandate of the ADP is to disseminate information from the research institutes to the farmers by organizing workshops/training and by direct contact between the extension agent and farmers.
<u>Optional/General</u> comments
