

SDI Review Form 1.6

Journal Name:	British Journal of Economics, Management & Trade
Manuscript Number:	2013_BJEMT_7429
Title of the Manuscript:	THE INFLUENCE OF THE SUPPLY CHAIN MANAGEMENT IN PRODUCTION PROCESSES FOR GREATER SME MANUFACTURING PERFORMANCE IN MEXICO
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The language is hard to understand and has to be thoroughly improved throughout the paper. 2. The hypotheses to prove by questionnaire are already known valid as the references say and the purpose of the research is not clear. What is the significance and contribution of this research? 3. In the theoretical model section, the authors try to show the reliability and validity of the data. I don't know why it is necessary. The data should be inconsistent since they are collected from different companies. Also, it would be helpful if the methods used in this section can be more explained in terms of purpose and technical background.	a).- The document was checked and adapted to English language b).- Significance and contribution of the paper based on hypothesis testing were adjusted in conclusions. Paragraph 2: In this meaning, the study shows clearly in the statistic analysis that the GCS positively influences in the development of the productive processes. Paragraph 5: The results obtained from this research; show that an efficient productive process allows largely a greater operational performance in SME. Paragraph 8: As it is reflected in the results obtained, the GCS is a key factor for the manufacturing SME to have higher performance and thereby a better business development. c).- Insert in the second row after the word "block" in order to further evaluation of the theoretical model's adaptation to explain its structural relationship.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
