PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	There is need for the Author to review articles published by scholars from the three regions in order to have an insight into other causes, consequences and structure of piracy. This will enhance the quality of the article.	Material based upon additional articles for the Gulf of Guinea and for Asia and South East Asia in particular have been included as appropriate throughout the manuscript. I agree that the result is an improved paper.
<u>Minor</u> REVISION comments	Author should attend to few editorials in the article.	Done I hope caught all of them
<u>Optional/General</u> comments	The article provided a comprehensive overview of maritime piracy in Africa and Asia.	Thanks for the comment.
