SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The theme is current and pertinent to the Journal and Management Education. However, the manuscript no is technically robust to review article. The articles inclusion criteria are not presented (e.g.: year, journal, keyword...) and systematically reviewed. Thus, the conclusion is not sufficiently supported with the review. The sections of the article end abruptly and need a more profound revision of the issues. There are citations that appear in the text, but are not presented in the references (e.g.: Jonathan and Mintzberg (2004); Edwin Locke and J C Spender (2011); Pistieau et al . , (2009)).	Now we have introduced a new table to support out conclusions. The new table indicates name of the author with year, journal etc., This table would support the conclusion. The references are now in order.
<u>Minor</u> REVISION comments	Necessity of revision of standards to list references and citations.	The references are now in order.

SDI Review Form 1.6

<u>Optional/General</u> comments	The theme can contribute to the increasing of managerial skills through the better qualification. However, the manuscript should be published in another type of journal. The nature and objectives of the research do not involve humans, directly.	Necessary corrections have been made in several places to increase the effect of managerial skills.
