PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The paper has improved notably with the additions along the lines of the suggested comments. As a final comment, I would strongly suggest that the authors mention some of the theoretical and empirical literature on the interactive role on development (for example on p.8) of <i>formal and informal institutions</i> (see for example C.R.Williamson, 2009, and B.Neyapti, 2013: - Williamson, C.R., 2009. Informal institutions rule: institutional arrangements and economic performance. Public Choice 139, pp. 371–387. - Neyapti, B., 2013, Modeling institutional evolution. Economic Systems 37, pp.1-16.	Section 2.3 of the paper made copious references to empirical literature establishing the relationship/ impact of institutions, both formal and informal, on economic development. However, I have reinforced this section by adding the very insightful contributions of Neyapti and Williamson on the same subject, as suggested by my reviewer.
