PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I think the authors are on the best way to develop an interesting and good paper, but It has however three rather serious shortcomings: 1.It will be necessary to reframe the literature review in order to position the paper. 2. two concepts: Ba and SECI model have been confused in the paper. The author did not gave the positive feedback on these two comments. 3. Last but not least, there have been a lot of paper focusing on how SECI theory applied in the process of KM.	Thanks for your comments and appreciation. 1. The literature has been reframe and review. 2. I found that some studies inappropriate have been deleted. While I found some good fits with the problem of the study and its problem. 3. In addition to justify why the studies were little. See p.9. line 1-5. 4. Also the reference has been formulated in accordance to the rules. Modify and correct some sources, according to the margins in the text paper. Please see the new review reference in the text paper and the reference list pp.22-23. 5 Concerning your comment No 2 and 3 : It has been addressing this issue through the development of a paragraph for the purpose of clarifying the overlap between them in the text research. Please see p.11.line 24 paragraph 6.4 I hope to get on your satisfaction. With Best Regards
