

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Economics, Management & Trade
Manuscript Number:	2013_BJEMT_5859
Title of the Manuscript:	Federation Account Allocation in Nigeria: Implication for Growth

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The results are clearer now in this revised form, unfortunately the paper still needs an enriched conceptual background and particularly more literature review. The author(s) had added "only one" additional literature in this revised paper. In addition, there are spelling errors for some words. The paper needs one more revision to improve the literature review section by citing more recent econometric papers dealing with account allocation in Nigeria and/or in the world and the spelling errors should be corrected.	We sincerely appreciate the contributions of all the anonymous reviewers towards the improved quality of this paper. As suggested: 1. The conceptual background has been enriched. 2. More recent econometric papers dealing with account allocation in Nigeria have been added. 3. Spelling errors have also been corrected. Note: (i) Highlighted in yellow are new additions/modifications. (ii) Highlighted in green are corrected spelling errors.
