Subject: RE: Request for final decision for manuscript number 2014_BJEMT_10056

The authors brought us an interesting research with good quality in terms of research design and presentation. Replies to the reviewers were comprehensive and extensive, by which have settled major concerns reviewers raised. In particular, I agree with the authors that the theoretical background was clearly addressed in due course with sufficient support from both of classical and current literature.

To the last, please be reminded that the format of tables needs to be amended into the same style. Wording in the references should follow exactly what it appeared in the original work, for example, "organization" and "organization" for titles of papers and journals. In addition, some references need to be checked again to amend those inconsistent, for instance, Morrison, R., (2008), McDonald, D. and Makin, P. (2000), and perhaps some others. Please also provide the date of access for the references from www.
