SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors need to (re)write a true introduction with explicit and clear motivations for their paper. They also need a detailed literature survey and the description of corruption, institutional quality and economic performance in Nigeria. Why the authors select the CIM to measure institutional quality? CIM measure judicial quality (Knack and Keefer, 1995; Chemin, 2009), Clague et al. (1999) discuss the CIM in detail. Thus, there may exist mutual causal relationship between CIM and Corruption. Unfortunately, the authors didn't take it into consideration. Additionally, the authors need to discuss the empirical results in detail.	
<u>Minor</u> REVISION comments	Quality of presentation, extensive editing of English language and style were required	
<u>Optional/General</u> comments	There is some questions about typesetting	

Reviewer Details:

Name:	Feng Wei
Department, University & Country	Department of Finance, School of Economics and Business Administration, Chongqing University, China
