SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment The paper presents an analysis of the effects of education expenditure and health expenditure in the reduction in poverty, income inequality, increase in enrollments and life expectancy for 40 countries in the period 1997-2007. DEA is the method employed in the study. It arrived at interesting results. However, in order to be published the author should revise the question below.	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	It should explain the reasons for choosing the definition of pro-poor and anti-poor growth employed in the paper. The box-plot shows the presence of outliers. What are the effects of removing the outliers in the results? The analysis of the results are short, there are 8 figures with few comments on them. The results should be better explored. Is it really necessary to employ DEA to arrive at the conclusions? What are the relationships between the results of the DEA and the pro-poor and anti-poor growth?	
<u>Minor</u> REVISION comments	What is DMUs (line 290)? The quality of the figures 5 to 10 should be improved. It is difficult to read the name of the countries. Sub-sections 1.1, 1.2 and 1.3 should be rewritten and they should be part of the introduction. The names Problem Statement, Objectives and Hypotheses, and Significance of the Study should be removed of the paper. Section 2 should start with the concept of poverty. The name Literature Review should be removed of the paper.	
<u>Optional/General</u> comments
