SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- It would be good if the topic is modified as "Factors influencing farmers' decision to shift to Organic Farming: The case of Gaza Strip" or - The author needs to revisit the keywords - There are serious spelling errors e.g. Literature Review (line 62)!!! - To measure/estimate attitude towards organic farming, a likert scale (-2 to 2) was used. This is uncommon in most studies which used 1-5 scale; this has to be justified - Good to use equation editor (line 180) - Table formats are not appealing for the Journal, three level tables are preferred	
<u>Minor</u> REVISION comments	- The theoretical justification of use of logit model is good but needs revision like the author can start explaining about the nature of the dependent variable, followed by discussion of available models for such kind of DVs (binary) and then justify selection of logit over the other alternatives	
<u>Optional/General</u> comments	- The topic in general is very interesting and timely. The contents of the manuscript and well articulated and objectives are adequately met - It is one of the good papers that i have ever reviewed
