SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- I couldn't see framework that author mentioned as main objective of this study. - Author has to explain clearly about approach of methodology and justify why using this? - with respect the policy recommendation i feel that Statements, are not derived from the results of this study; as such those policy recommendations cannot be said to come from the study. - the result and discussion is over summarized such that the specific objectives are not clearly treated - there was no reference in introduction and also he/she just used 29 references for this article that is not acceptable to me. With this references not me other researchers also cannot say is it Author words? Add more references to increase value of your study....	
<u>Minor</u> REVISION comments	The study doesn't show whether or not the existing policies are consistent with the existing pattern of production and export.	
<u>Optional/General</u> comments	Limitation? Future research?
