

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Economics, Management & Trade
Manuscript Number:	2014_BJEMT_9682
Title of the Manuscript:	The Impact of Accounting Ethics in Improving Managers' Behavior and Decision Making In the Jordanian Business Environment.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Some of the previous comments are remaining unanswered as follows: 2. Hypotheses should add several logical induction processes to help the readers to understand. (i.e. Please add illustrations of the three hypotheses separately) 8. Where did those measurements come from? The author should resolve the measurement problem first. (This means: as to the questionnaires, are you reference to the previous works? Or develop by yourself? What is the scale development process?) 10. Why used the Jordanian companies as your population? (i.e. Please find reasonable reasons of adopting this sample) 11. The author said that this research collect secondary data, but we did not see the result of the secondary data. (If the secondary data only refer to the literature review, it cannot claim that they collect the secondary data. Please revise)
