

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

|                          |                                                                      |
|--------------------------|----------------------------------------------------------------------|
| Journal Name:            | <a href="#">British Journal of Economics, Management &amp; Trade</a> |
| Manuscript Number:       | 2013_BJEMT_8837                                                      |
| Title of the Manuscript: | AN ECONOMETRIC ANALYSIS OF DETERMINANTS OF EXTERNAL DEBT IN PAKISTAN |

**PART 2:**

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Authors' response to final evaluator's comments |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| <ul style="list-style-type: none"><li>• Generally the paper is potentially good. The primary concern is the flow of ideas and grammatical construction (qualitative component) used by author which makes reading and comprehension slightly difficult for me and perhaps will be for potential readers of this paper.</li><li>• Another issue is the referencing style adopted by author, but he indicates it was another reviewer's suggestion which he incorporated. I entreat the Editorial Board to make reference to the Journal's guideline for referencing.</li><li>•</li><li>• The methodology, i.e. econometric model and estimations are well covered and discussions, conclusions and results are based on findings.</li></ul> |                                                 |
