SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	1. The authors should discuss/describe more about the background of these "big events" in China. 2. The authors should explain and discuss why only to investigate Guangdong Province, rather than Shanghai or Beijing, or even the whole of China. 3. The authors should discuss more about the implications of empirical results in your "Conclusion".	1. We agreed this point and have added more explanations of China's big events in this paper to make these big events clearer. 2. Firstly, in INTRODUCTION, the data indicates that "Guangdong's foreign trade plays a vital role in China and even the whole world". Inside China, the top one region in foreign trade amounts is Guangdong province. That's why we investigated foreign trade in Guangdong only. Secondly, in LITERATURE REVIEW, we mentioned Zhenquan (2009) studied the structural change of foreign trade in the whole of China. So we only investigated Guangdong's issue in our paper. 3. We have done minor revision in our "Conclusion".
<u>Optional/General</u> comments
