	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	This paper applies a SUR model to estimate the dynamic interrelationship of GDP, Production Sectors, Trade and FDI in the UAE. The empirical restricted VAR method is fine and the findings are reasonable and interesting. It shows the FDI policy emphasizing meeting domestic needs rather than promoting exports in the UAE. Overall, it is a well-written paper.	This comment is encouraged for more focus on my field. I acknowledge it is a good motivation for writing a new paper.
