FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
(a) Author has made some development, it is good. (b) Objectives of the research are not yet clear. (c) The first term of the paper (in the abstract) i.e. "grate" should be written as "great". This mistake implies that there may have such mistakes throughout the paper. So author must double check the language correction and attend on some more improvement with the help of capable one (language). (d) I would like to suggest a tile "Study on Housing Price and Affordability in Some Selected Cities in China"	Many thanks to the anonymous reviewer for the patience and meticulous review. Your affirmation is the greatest encouragement to me. My responses are as follows: (1) Objectives of the research have been further elaborated in "Introduction". (2) Some statements and errors have been corrected as marked in yellow. (3) That's a perfect idea to change the title to "Study on Housing Prices and Affordability in Some Selected Cities in China".
