PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Abstract -The major finding and major recommendation are not clearly stated in the abstract. -Line 14; give space between losers, effectiveness Introduction -Introduction has no single source. -Line 22 to 25 no source -Line 55 what is this word WorldComcases? or do you mean WorldCom cases LLiterature Review Line 76; space between frominvestigative -The author should go through the paper and check the wordings, many are not properly spacing. -Line 173; Which method of citation are you using? APA or what? Please. use the recommended method	These are very useful and reasonable reviewer's comments. I have mimicked the citation style I found in the journal's author's guide and in some of the previous articles published in this journal. This reviewer recommends that I place my policy recommendations after the "conclusion" paragraphs. I am used to having the conclusion as the final piece of any writing. However, I have done as required by this reviewer and hope that the other reviewers will agree with him.
<u>Minor</u> REVISION comments	Suggestion: -conclusion comes (precede) recommendation -All headings and keywords to be written in lowercase with the first letter of all major words to be written in uppercase	
<u>Optional/General</u> comments	Line 67- this is American spelling - behavior. You may change it to behaviour
