

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Economics, Management & Trade
Manuscript Number:	Ms_BJEMT_18824
Title of the Manuscript:	Effect of CEO Pay on Bank Performance in Nigeria: Evidence from a Generalized Method of Moments
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors do not understand the comments of the third and ignored the second. The third observation refers to the need to collect references in one place, whereas they are distributed throughout the article. The wording of the basic idea of the article is not clear and detailed enough, but the authors simply referred to a specific section of his article.	1. The main ideas of the study are: (A) Previous studies on executive compensation and firm performance in Nigeria concentrated on non-financial firms without examining the impact of CEO pay on firm performance. However, the issue of persistent increase in CEO pay of Nigerian banks has been a subject of concern among stakeholders; hence this study. (B) All the previous studies in this area from Nigeria ignored the issue of dynamic endogeneity which makes their results questionable. This study takes care of endogeneity problem which makes the results better. 2. If I get the issue raised here right. All the studies cited are referenced accordingly under references.
