There are still some corrections have not been made as follows: • The two methods used are lacking the details. For the mentoring & coaching, it is remaining unknown who are the mentor, how long is the mentoring & coaching, etc. • As for the survey – need to mention the items included in the survey, example of items asked, etc. • It is still not clear the effects of training on consumptions. • There should be two separate findings for the two types of businesses – please use sub-headings, each for catering and meatball. • Lines 232-233: “the activities had been shown to result in improving the business productivity” – still no evidences provided. • Line 268: “Revenue increased to 70%....” . This information should be reported in the finding, not in the conclusion.
