SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	While I like the overall structure of the paper, it is soft to read because it appears to have been written carefully.	
<u>Optional/General</u> comments	The paper addresses an interesting and important topic, namely the impact of foreign capital flows on domestic investment, focusing on the Impact of Globalisation debate. It is interesting in that it looks at short-run and long-run impacts and distinguishes among the variables examined. The empirical approach seems reasonable. The data section needs elaboration, as does the theoretical model. The whole of paper need to be updated by new references. Two references are recent (2011; 2013) Conclusion: the authors could transform recommendation section into future research and point the theoretical contributions and the limitation of this work.
