SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This, as the author indicates, is an empirical research (for in sample and out sample). It is not formal one because there is not an specific model for these events, however the tools and procedures used to handle the data, in a period of about 24 years, are correct for instance ADF and PP tests. Manuscript well organized. The paragraph at the beginning of subsection 4.4 and right before formula (6) must be rechecked and rewritten, there are some bad written words.	
<u>Minor</u> REVISION comments	In equation (1) the meaning of λ_1 , λ_2 , λ_3 , λ_4 must be stated in the same way as the rest of the parameters are.	
<u>Optional/General</u> comments	Pictures are very didactic and illustrate very clear the results, specially the ones in page 11.
