SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The title is more than 21 words and is formed by the variables used in the analysis. The authors should recast it. The opening statements of the abstract are the variables just as in the title. The first sentence needs to be recanted. The introduction, theoretical framework and literature review is more than 50% of the entire paper. Consider reducing it. The goal and specific objectives are not very clear. Are they also the variables under investigation? What are your specific objectives? The units of measurement of the variables are not indicated. The authors seem to reduce Nigerian economy to a three-sector model. Where is the place of exchange rate, import and export, manufacturing etc in the model? The style of referencing is very confusing and I don't understand what reference no.17 means. what is the contribution of this paper to existing body of knowledge? The recommendations should be very specific and practical.	

SDI Review Form 1.6

Minor REVISION comments	The first keyword is not necessary and the last three can be consolidated into one. Any of the them can represent the others.	
Optional/General comments
