

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	MS: 2013_BJMCS_3049
Title of the Manuscript:	Bounds for the Convex Combination of the First Seiffert and Logarithmic Means in Terms of Generalized Heronian Mean.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors made necessary corrections. I have one remark only. I have written in the review, that the authors should include suitable chosen (not all of possible!!!) articles to the references. We should notice, the references can included only papers which are cited in the body. Therefore, the authors should make an analysis the references once more. I think, the paper of such length should include on the average 5-15 articles in the references. Taking the above into consideration, I recommend the paper to publish in British Journal of Mathematics & Computer Science }after having make the minor revision related to the references.	I agree, but the second reviewer (see SDI-PRF-BJMCS-3049-YC-MI(2)) recommended me to include 23 specific articles. So, I included them as references.
