<u>Compulsory</u> REVISION comments	After seiously reading, I make some suggestions as follows: Referee report on the pape: Oscillation criteria for the solutions of higher order functional difference equations of neutral type. In this paper, necessary and sufficient conditions are obtained of a class of netral functional difference equation. The results of this paper improve and extend some recent work [4, 12]. This paper is interesting and the proof is correct. Therefore, this paper can be acceptable. *comments received as email from reviewer*	Thanks.
