

SDI Review Form 1.6

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2013 BJMCS 3481
Title of the Manuscript:	Oscillation criteria for the solutions of higher order functional difference equations of neutral type

General guideline for Peer Review process is available in this link:

- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. In page 7, line 6, "From Lemma 2.9..... that $l=0$", the authors used Lemma 2.9. But in (3.10), $p=1$, this case is not satisfied the condition " p is not 1" of Lemma 2.9. So I want the authors give the proof. 2. Theorem 3.4 , the conclusion (a) "every solution" maybe "every bounded solution".	1. Pl. see remark 2.10 for the proof. 2. corrected. Thanks.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
