

SDI Review Form 1.6

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2013_BJMCS_3465
Title of the Manuscript:	A GENERAL INEQUALITY RELATED TO VARIATIONAL INEQUALITIES AND ITS CONSEQUENCES

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	See the next column	
<u>Optional/General</u> comments	Problem considered in this paper is well known and is called the equilibrium problem, which is due to Blum and Oettli(1994). In this problem one consider the underlying set K as a convex set. In view of this fact, this problem does not include the special cases , I, 5, where the underlying set is not a convex set. In these special cases, the set is INVEX set, which may not be convex set. see, for example, Noor [15]. Due to this fact, papers [3, 9,17, 21, 22, 23] are irrelevant.	In the definition, the set K is assumed to be a nonempty set only. In the paper, we have not claimed that the results with K a convex set includes as particular cases results with K an invex set.
