- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	1. abstract should be rewritten to reflect the novelty of the research 2. Line 21. Often in practice.....fail. That statement is over stated and it's not correct. Real world experiments have noise in the data and cardinal statistical methods are many times applied to model them. 3. Consider re-sectioning or indexing your manuscript to interest the reader with your contribution. 4. The research should reduce on rewriting the already known facts in all sections and instead refer to them. E.g., with the Cholesky procedure	The abstract was rewritten to reflect the originality of the work This has been corrected Ok , noted
<u>Minor</u> REVISION comments	1. Ref 17, the initial of the author should be capitalized i.e. P not p. 2. lines 150 & 181, spelling of Oettli 3. it looks like self citation is apparent which could bring yawns in the validity of the study and	Corrected corrected

	scope of research.	
<u>Optional/General</u> comments	1. The paper is not clearly pointing out the researcher's contribution, and this is due to poor sectioning. 2. The paper should be published with minor corrections, 3. I like the conclusion when it points out that more research could be done in the same area or line.	Ok Ok Thank you
