SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The results are without new ideas and methods. All is the same as in [4] for $n=2$. Also, some papers in the referent list are as [4] for $n=4$. It is clear to each expert that such papers are not publication in any journal.	Not agreed with the comments as the cases mentioned are for $n=2$ or 4. We have done it for n even and for n odd it is still an open problem. Our paper is generalization of the previously known results in this area. We think that it should be published anywhere.
