SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This paper is well written, presenting method of solving the single-source path expression problem for a reducible graph by examining its loop tree, and necessary and sufficient loop tree condition (although not being a specialist in this specific topic I can not fully certificate its level on innovation with other techniques non being cited by the authors).	See the new Section 1.6, written in response to another reviewer's comment.
