

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2013_BJMCS_6470
Title of the Manuscript:	THE BETA GENERALIZED INVERSE WEIBULL DISTRIBUTION
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The beta generalized inverse Weibull distribution (BGIW) is suggested in this paper and the effectiveness is validated. This is an interesting work. Two comments are given here for the further improvement. (1) The format of the presentation is suggested to be revised. (2) Some related references are suggested to be added to broad the range of this paper. [1]. Girolami, M., & He, C. (2003). Probability density estimation from optimally condensed data samples. Pattern Analysis and Machine Intelligence, IEEE Transactions on, 25(10), 1253-1264. [2]. Deng, Z., Chung, F. L., & Wang, S. (2008). FRSDE: Fast reduced set density estimator using minimal enclosing ball approximation. Pattern Recognition, 41(4), 1363-1372.	1) Done 2) Reference to these proposed articles is not in the field of this particular scientific paper.
<u>Optional/General</u> comments
