

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2013_BJMCS_6698
Title of the Manuscript:	New iterative scheme for common solution of equilibrium problems, variational inequalities and fixed point of k-strictly pseudo-contractive mappings in Hilbert space
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript deals with an iterative scheme for finding a common solution to a system of equilibrium problems. The only result presented is Theorem 3.0.1. The rest is taken from other works. This result is simply obtained by standard calculations without any use of powerful mathematical ideas. The mathematics involved in the proof are very poor, actually just exercises. The construction of the algorithm given here is artificial and is not meaningful for the mathematical study of the stated problem. No application in mathematics is given.	We have included mathematical applications of our main theorem, and have improved the mathematics involved in our proof.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
