

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2013_BJMCS_6730
Title of the Manuscript:	THE BINOMIAL AND MULTINOMIAL COMBINATORIAL CONVOLUTION SUMS
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This paper is very interesting paper. Using Liouville identity, the author makes many results. For example, Theorem 1.5 is very nice result related to convolution sums and divisor functions. But the author doesn't insert some reference. Using this theorem, if the author makes generalized theorem, then this result is very good. So, I strongly suggest this paper is accepted this journal after revised as attachment file.	I accept the reviewer's comments so I put the references in each propositions.
<u>Minor</u> REVISION comments	See attachment file.(Please! Must revise it.) 1. Change Theorem 1.2,1.3,1.4 to Proposition(insert reference). 2. Delete of proofs of these theorems.(See attached file) 3. Delete Section 2(Because these results are different part of a result of main theorem), so I strongly suggest the author makes another article using this section. Insert reference (see attached file)	I delete the Section 2.
