

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2013_BJMCS_6940
Title of the Manuscript:	SEMIGROUPS CONNECTED WITH PARAMETER-ELLIPTIC DOUGLIS-NIRENBERG SYSTEMS
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	In this article author/s have discussed the same problem considered by Dreher, but used slightly different approach. They extended the results for mono-order systems to a certain class of Douglas-Nirenberg systems of multi-order type, means diagonal operators are not all of the same order. In this paper authors have tried to generalize the problems in reference [7]. Section 4 for multi-order case is interesting. English language is adequate. I recommend this paper for the publication in the British Journal of Mathematics and Computer Science in the current form.	This was taken into account
<u>Minor</u> REVISION comments		"
<u>Optional/General</u> comments		"
