

SDI FINAL EVALUATION FORM 1.1

PART 1:

|                          |                                                   |
|--------------------------|---------------------------------------------------|
| Journal Name:            | British Journal of Mathematics & Computer Science |
| Manuscript Number:       | 2013_BJMCS_6716                                   |
| Title of the Manuscript: | BERNOULLI POLYNOMIALS AND CONVOLUTION SUMS        |

PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Authors' response to final evaluator's comments                                                                                                                                                                                                                                                                                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>The author revised his /her paper carefully according to the referee's comments.</p> <p>So the reviewer is gladly recommending that this revised paper will be able to be</p> <p>Accepted for publication at BJMCS, with no further revision.</p> <p>One more thing: The reviewer encourages the author to review Sections 1.6, 1.7 and 1.8 of the following very recent book (the involved research subjects are discussed in a rather extensive way):</p> <p>H. M. Srivastava and J. Choi, Zeta and <math>\zeta</math>-Zeta Functions and Associated Series and Integrals, Elsevier Science Publishers, Amsterdam, London, and New York, 2012.</p> <p>So the author is advised to refer this book at the paper.</p> | <p>I also want to refer this book, but I can not borrow it nowhere. Moreover, my school, chonbuk national university does not have this book.</p> <p>So can you give me a copy of the Section 1.6, 1.7, and 1.8 in the book which you propose? Then, I will summarize the contents and I will be able to refer this book in my paper.</p> |
