PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	In this paper the author introduces a new subclass of multivalent analytic functions defined by fractional differintegral operator. Making use of known techniques they prove some interesting theorems concerning these sets of functions. I recommend this paper for publication after the following minor revision. 1. 2000 Mathematics Subject... should be 2010.... 2. There are some grammatical defects: page 3, line 7. 3. In the text (page 3) D.-G. Yang[24] should be Yang[24]...	
<u>Optional/General</u> comments
