

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	2013_BJMCS_5999
Title of the Manuscript:	On Orthogonal Double Covers of Circulant Graphs
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The main contribution of the paper is concerned with the starter maps of the orthogonal double covers of Cayley graphs. Author studied the use of this method to construct orthogonal double covers by a complete bipartite graph, a complete tripartite graph, caterpillar, and a connected union of a cycle and a star whose center vertex belongs to that cycle. The proofs are well explained and look correct . The paper has nice and original results. I recommend the paper for publication in British Journal of Mathematics & Computer Science.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
