

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	2014_BJMCS_10800
Title of the Manuscript:	Traveling wave solutions of the simplified MCH equation via $\exp(-\Phi(\xi))$-expansion method
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors present a good technical paper with relevant topic and proper research methodology. It is a very nicely written paper and contains some new results. I recommend that the paper may be published after complying with the suggestions made. Suggestions: The following papers should be cited and added in the list of references. • The improved (G'/G)-expansion method to the (2+1)-dimensional breaking soliton equation. <i>Journal of Computational Analysis & Applications</i>, 16(2), 220-235. • The modified Benjamin-Bona-Mahony equation via the extended generalized Riccati equation mapping method. <i>Applied Mathematical Sciences</i>, 6(111), 5495-5512. • New approach of (G'/G)- expansion method and new approach of generalized (G'/G)-expansion method for nonlinear evolution equation, AIP Advances, 3, 3 (2013) 032116. There are some typographical errors in the manuscript.	1. As per recommendation of reviewer 2, we have included reference in the revised manuscript (see Ref. 16-18). 2. Typographical and grammatical errors have also been corrected. Now we believe that the referees will accept our manuscript in its present revised form.
<u>Minor</u> REVISION comments	I recommend its acceptance in your journal after minor revisions.	
<u>Optional/General</u> comments
