

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_9650
Title of the Manuscript:	Smooth soliton solutions of ZK(2,4,-2) equation
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The paper under review considers a class of so-called ZK(2,4,-2) equations. Smooth soliton solutions are investigated. The results seem original and may be worth publication in British Journal of Mathematics & Computer Science. However, the proofs contain a number of misprints or unclear points, some listed below, that require some correction or explanation: 1、 In page 4, “Thus, the equilibrium point A2 are saddle points, the equilibrium points S\$ and A1is a center.” Please add the satisfied parametric condition. 2、 In references [2] “ZakharovCKuznetsov” should be “Zakharov-Kuznetsov”.	1, The satisfied parametric condition have been shown in page 3, the last 6 lines. 2, The errors in the reference [2] have been corrected.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
