Subject: Re: Request for final decision for manuscript number 2013_BJMCS_6547

Here are my comments:

1. The author should write the family name for in text citation (Please check the introduction part)
2. Please use the standard format to write the references. (Please check the list of references)
3. The following sentence is not clear: "The samples' value, which define and form the behavior and the pattern of the audio basically are **data (?)**, which are defined by specific value per sample."
4. I think you must write this sentence "In order to judge the modeling" as "In order to validate the model"
5. I think you must write this sentence "This value will help us to judge whether" as "This value can be used to identify whether". Please check the rest of your paper.
6. The author should revise and rewrite this paper again. His writing skill needs to be improved in order to get this paper published. I don't have enough time to correct it.

I'm really sorry, we cannot accept this paper.
