

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	MS: 2013_BJMCS_5967
Title of the Manuscript:	GENERAL EQUILIBRIA
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is a serious and interesting work, devoted to discussing properties of the equilibrium critical points for several types of dynamical systems. The discussion revolves around connections with the Efficiency and Choquet boundaries. The paper investigates the existence and the properties of equilibrium points sets and presents two important coincidence results between the equilibrium point's sets and the Choquet boundaries. A new approximate modality for the equilibrium points sets is tackled. I recommend acceptance.	
Minor REVISION comments	A section Conclusions might be appropriate.	
Optional/General comments	None	

Note: Anonymous Reviewer
