

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2013_BJMCS_8534
Title of the Manuscript:	New iterative method for solving the Fornberg-Whitham equation and comparison with homotopy perturbation transform method
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This paper is interesting and should be published after minor revisions. The following articles should be added 1. Homotopy perturbation and Adomain decomposition methods for solving nonlinear Boussinesq equations" <u>Communication on Applied Nonlinear Analysis, USA, International publications</u>, Volume 15, No.3, (2008), pages 57-70. 2. The homotopy perturbation method for solving nonlinear Burgers and new coupled MKdV equations " <u>Zeitschrift fur Naturforschung A</u>, Verlag der Zeitschrift fur Naturforschung, Tübingen_A Journal of Physical Sciences, Germany , Volume 63a, No (10) , (2008), 627-633. 3. On using the homotopy perturbation method for finding the traveling wave solutions of generalized
